PROTECT YOUR CUSTOMERS AND YOUR BRAND

TAKE THE EFFORT AND RISK OUT OF FOOD QUALITY MONITORING

Food Quality Assurance and Operational Efficiency

Automated HACCP Plan Management – By automating management of HACCP plans, SureCheck helps you ensure critical control points are met and that proper corrective actions are taken when necessary. With real-time data delivery, it enables exception-based reporting while capturing timestamps and operator names for audit trails.

Reduced Labor Costs – SureCheck's automated checklists have reduced the time to complete food safety inspections by up to 60% when compared to pen-and-paper systems.

Consistent and Complete Record Keeping – Provides a platform for repeatable and measurable information logging for both temperatures and tasks. SureCheck maintains excellent records of compliance including execution timing, missing checklists, non-observed items, top violations, violation details, single checklist detail and a daily summary.

Minimal Training – Easy to use checklist work flow, reporting and administration requires very little training.
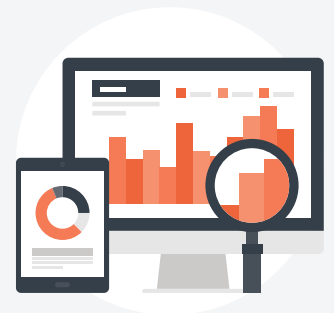

Minimal Up-front Costs – SaaS model requires minimal capital expenditures compared to a client/server model.

Increased Record Accuracy – Automated data collection (temperatures and RFID tags) and archiving provides dependable monitoring data.

TIME FOR FOOD QUALITY INSPECTIONS REDUCED BY 60%

REPEATABLE & MEASUABLE INFORMATION LOGGING

MINIMAL CAPITAL EXPENDITURE REQUIRED WITH SAAS MODEL

Quick Deployment and Easy Application Management

SureCheck SaaS model enables you to deploy the system quicker than if you had to install the software in your environment. With the SaaS model, you have every-thing you need (hardware, software and ongoing updates) so you don't have to worry about the technology and can focus on your business.

Multiple Languages/Locales – English (Canada, Ireland, United Kingdom and United States), French (Canada and France), German, Spanish (Mexico, Puerto Rico and Spain) and Swedish.

Enterprise Reports – Minimize paper records of employee-assigned tasks and compliance.

Site and Consolidated Reports – Execution timing, HACCP and regulatory, Recall alert action status, Missing checklists, Not observed, Top violations, Violation details, Single checklist detail and Daily summary

Flexible Hardware Options – Choose the device that best suits your operational and financial requirements: SureCheck V6 is compatible with iOS (iPod Touch and iPhone), Android and Windows Embedded Handheld devices.

Task Checklist Monitoring – Inspection reminders Checklists: One-point and multi-stage food handling processes (e.g. cooling), one-time or repeat scheduling and transmission (checklists sent to enterprise) Audit Trail: Operator name, location verification, and timestamp

Web-Based Application Management – Centralizes updates for enterprise consistency: location setup, user admin, programmable definitions, critical limits, corrective actions, checklist construction, and automatic synchronization to hand-held units

Temperature Measuring Device(TMD) – Enables three temperature measuring modes: Probe, infrared or RFID with Bluetooth wireless connectivity

HOW DOES SURECHECK WORK?

Hand Held Device(s)

Temperature Checks and Checklists taken locally

Sent to the Cloud

Cloud-Based Web Application

Data Collection & Reports for all locations

OPTIONAL HANDHELD DEVICES

INTELLIGENT CHECKLISTS™ WITH CORRECTIVE ACTIONS

PAR SureCheck TMD

Enables three temperature measuring modes: Probe, infrared or RFID with Bluetooth wireless connectivity

Send accurate temp/task data when asked through Bluetooth, also receive and execute commands from SureCheck Hand Held Devices

PAR | SureCheck®
Advantage

ALL-IN-ONE FOOD QUALITY MONITORING

Protect your customers and your brand.

The PAR SureCheck® Advantage is an IoT (Internet of Things) mobile solution designed for food quality and task management. The Advantage features the latest in Intel® architecture allowing for the integration of multiple functions in an all-in-one device.

Combined with SureCheck SaaS (Software-as-a-Service), the Advantage assures Hazard Analysis & Critical Control Points (HACCP) compliance while improving operational efficiencies by 60% (compared to traditional pen and paper). In addition, SureCheck connects to a cloud-based enterprise server for maintaining accurate records for auditing and analytics.
